Brain

A

What about the waves of your brain?

B

I'm not talking about neurolinks, I'm talking biology. Think of it-  
they fucking-

A

He's still talking about it!

B

It's brain goo! They inserted it into uhh... a vile, and the brain goo  
plays chess or whatever. Like, I don't know what the brain goo does,  
but like it knows, it's the goo that learns, it's not the machine  
that does that shit. It doesn't learn nearly as fast as the brain  
goo, we don't need machines making us learn telepathy, we need to  
evolve it. This shit is stronger than Vecna!

A

And do the lizard people control these brain goos?

B

Okay? And they're like HUGE all right? They're like this big. That  
fucker?

A

It's the scientists that puts the brain goo into the viles

B

And they have dry skin and lay under a heat lamp called the sun?

A

Lets- lets inject ourselves with fungi, fungi is really smart!

B

Spiderman fucking taking mushrooms, then he'd be mushroom man. I'd-  
I'd be like I'm mushroom man, I am the fucking ultimate lifeform, I'd  
be part mushroom.

A

This is only gonna get worse when I move in, I hope you understand that

B

Uh-huh...

A

Yeah, uh-huh, your face is going to fall off

(Long pause)

B

I tried running up the hill, cus I was like okay, I have to before we meet you in Pogue. So I started running up like, the little like, whole side of the parking lot and I slipped and I went, landed like *this*, hit my head and went *bam!*
